**CONTACT/SUPERVISOR:**

Ben Franklin

**CONTACT PHONE NUMBER:**

801-538-4763

**JOB DUTIES:**

Utah Natural Heritage Program (Habitat Section UDWR) in cooperation with the U.S. Fish and Wildlife Service and The Nature Conservancy will be surveying for new populations and inventorying sensitive plant species. Project areas are in southern Utah County, southern Uinta Basin and the southern Great Basin. The primary responsibility is assisting Heritage Program botanists with this effort. Working periods consist of 5 consecutive days in the field with weekends off. A typical workweek consists of 40 to 50 hours. Field transportation and a grocery allowance are provided.

**ADDITIONAL INFORMATION:**

Basic plant identification skills are required. Botany survey technicians must be able to work well with others and alone. They must be willing to work long days at remote locations, car camp for weeklong periods and hike in rugged terrain. Technicians will work with GPS receivers; record survey/inventory results, habitat data, etc. in field notebooks; and other related duties as assigned.

**HOUSING PROVIDED:**

No
